Xincheng Yang

Email: yangxc504@outlook.com GitHub: github.com/xyang76 Location: United States Phone: +1 (312) 532-4153 Website: xyang76.github.io

Research Interests

Distributed Systems; Fault Tolerance (CFT/BFT); Replication; Sharding; Scalable Consensus; Heterogeneous Computing; Distributed Shared Memory.

Education

Ph.D. in Computer Science, Illinois Institute of Technology 2017 – 2026
M.S. in Computer Science, Illinois Institute of Technology 2015 – 2017
B.S. in Mathematics, Tianjin Normal University 2006 – 2010

Publications

1. **Xincheng Yang, Kyle Hale**. *Shipyard: A Multi-Leader Consensus Protocol with Auto-Balanced Leadership of the Sharded Keyspace*. Proceedings of the IEEE International Parallel and Distributed Processing Symposium (IPDPS), 2026.

2. **Xincheng Yang, Kyle Hale**. *CoPPar Tree: Fast and Composable Consistency at Global Scale*. Proceedings of the International Symposium on Parallel and Distributed Computing (ISPDC), 2025.

3. **Xincheng Yang, Kyle Hale**. *The Consistency Correctness in CoPPar Tree*. arXiv, 2026.

Research Experience

Early in my PhD, I explored research topics related to FLX (Computer Networks, Elsevier, 2007) and, beginning in 2022, developed an independent research direction on sharding-based consistency, which resulted in two first-author publications.

- Implemented **Shipyard**: Designed, implemented, and evaluated the protocol, integrating it into the EPaxos codebase. Shipyard outperforms the state-of-the-art EPaxos (SOSP '13 & NSDI '21) protocol in throughput by reducing message communication complexity.
- Implemented **CoPPar Tree**: Extended the ZooKeeper source code to implement the structure. CoPPar Tree outperforms ZooNet (ATC '16) by using a history composition mechanism to avoid synchronous waits for cross-shard operations.
- Contributed bug fixes to **ZooNet** (USNEX ATC '16).
- Implemented OpenMP task-flow execution support in the **Nautilus** AeroKernel runtime, exploring lightweight runtime scheduling.

Earlier Work Experience

Software Engineer, Chengdu Calabar IT Co., Ltd., Chengdu, China Aug. 2011 – Dec. 2013

- Developed enterprise applications using Java and JavaScript.

Software Engineer, Transcosmos Inc., Tianjin, China Dec. 2009 – Jan. 2011

- Developed enterprise applications using C# and SQL stored procedures.

Technical Skills

Languages:	Go, C/C++, Java, Rust, Python, JavaScript, SQL, Bash
Parallel & HPC:	OpenMP, MPI, parallel runtime systems, task scheduling
Distributed Systems:	Replication, consensus, sharding, distributed transactions
Fault Tolerance:	CFT, BFT, failure recovery
Systems & Runtime:	Linux (Ubuntu), QEMU, Docker, ZooKeeper (source code modification), Amazon EC2
Compiler & PL:	Haskell, OCaml, Racket
Tools:	Git, LaTeX

Talks & Presentations

- *Shipyard* (Oral), 40th IEEE International Parallel & Distributed Processing Symposium (IPDPS 2026)
- *CoPPar Tree* (Oral), 24th IEEE International Symposium on Parallel and Distributed Computing (ISPDC 2025)
- *CoPPar Tree* (Poster), 10th Greater Chicago Area Systems Research Workshop (GCASR 2023)
- *Bricks* (Poster), Middleware 2021

Teaching Experience

- Teaching Assistant, Programming Languages and Translators, 2019 Fall – 2026
- Teaching Assistant, Advanced Database Organization, Summer 2019
- Teaching Assistant, Introduction to Information Security, Spring 2019
- Teaching Assistant, Operating Systems, Fall 2018
- Teaching Assistant, Database Organization, 2017 Fall – 2018 Spring

Patent

US Patent No. 12373413
